

Recommendation Letter

May 21, 2026

To Whom It May Concern,

I am pleased to recommend **Hashmatullah Azizi** for his academic application. I know him as his Machine Learning teacher at Kazakh-British Technical University. During the course, he showed strong interest, discipline, and a serious attitude toward learning.

Hashmatullah is a motivated Computer Systems and Software Engineering student. In Machine Learning, he demonstrated good understanding of key ideas such as data preparation, model training, evaluation, classification, and regression. He was especially interested in using machine learning to solve practical problems, not only learning the theory for exams.

What I appreciate about him is his steady work ethic. He asks questions, tries to understand mistakes, and improves his work step by step. He can work both independently and with teammates, and he shows responsibility when completing academic tasks and projects.

His background as an international student has also made him adaptable and open to new environments. I believe these qualities will help him succeed in a new academic setting and contribute positively to the university community.

Based on his academic motivation, technical interest, and personal responsibility, I recommend Hashmatullah Azizi for this opportunity. I believe he has the potential to continue growing in software engineering and machine learning and to use his knowledge for useful real-world solutions.

Sincerely,

Adilet Yerkin

Machine Learning Teacher

Kazakh-British Technical University (KBTU)
